

# ALUMINIUM BALUSTRADE SYSTEMS

FROM GLASS OUTLET

## Visor™

Glass Outlet is proud to introduce a new architecturally inspired balustrade system Visor™ – where no welding is required! This stunning new balustrade system incorporates innovative and unique features, blending functionality, safety, and aesthetic appeal. The modern and highly stylish Visor™ uses 50mm x 10mm vertical balusters with 90mm spacings and is available in Matt Black, Pearl Matt White or Mill finish.

## BARR

Elevate aesthetics and functional living spaces with BARR – the brand new and ingeniously designed 50x25mm vertical baluster aluminium balustrade system. Panels are fully welded ready to install and are easily width adjustable. Pushing the boundaries of modern design and craftsmanship, we've revolutionised traditional balustrade systems.

## Perf

Premium Perf is a complete balustrade system featuring the growing trend for aluminium punched perforated infill panels.

As an alternative to glass, a number of key features make perforated aluminium an ideal selection including: shatterproof, low maintenance, extremely durable and corrosion resistant, wind can pass through perforated holes being fully aluminium, application of the new Glass In Buildings Standard (AS1288-2021) is not relevant.

---

## Aire™ Picket Full

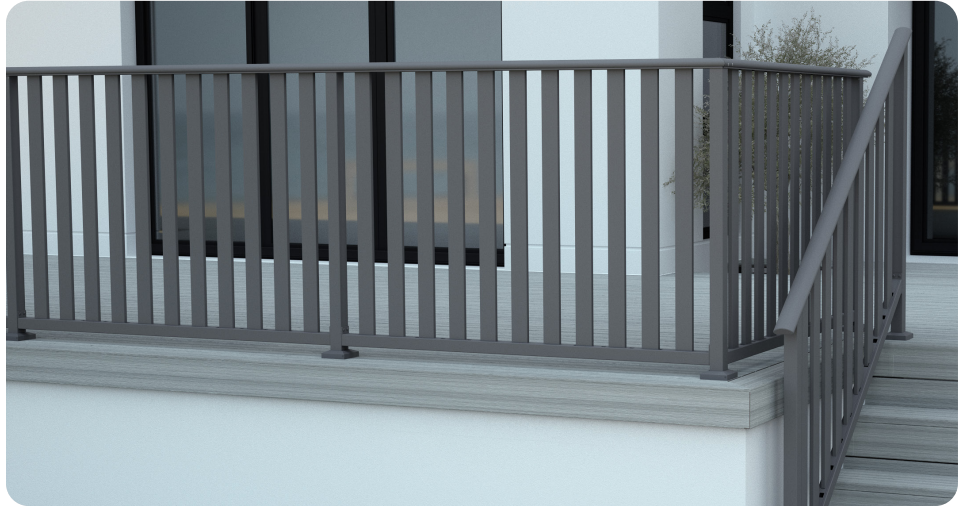

AIRE™ is a complete aluminium picket balustrade system featuring innovative patented non-weld technology and is ideally suited for new builds or renovations. This stunning system features vertical 16.5mm square balusters coupled with sturdy 50x50mm posts and the option of either a rectangular or oval handrail.

---

## Aire™ Slat Full

Vertical slat 65x16.5mm slat balusters with 64mm gap spacing. Increasingly popular having regard to Hamptons inspired design. No welding required.

---

## Aire™ Slat 3-Rail

Vertical slat balustrade is also available with a visibility gap at the top.

---

## Aire™ Horizontal

AIRE™ Horizontal Slat Balustrade is a complete non-weld system which perfectly typifies the saying 'simplicity is the ultimate form of sophistication'. With sleek lines and innovative design consideration ensuring screw fixings are hidden, the system is easy to install and yet provides for a stunning finish.
