

# NEW RELEASE

## BARR FENCING

### Overview

BARR is a new design sensation providing the much sought after 'floating battens' look.

Panels & gates are welded and are made from 50x25mm aluminium extrusion with a sturdy 25x25mm extrusion utilised for top/bottom rails.

BARR's unique style is achieved via the 25x25mm rails passing through precision punched holes in the 50x25mm pickets – NOT face welded.

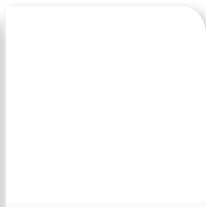

**This key design feature results in a panel which is unparalleled in strength and style.**

### Finishes —

Genuine Akzo Nobel powder coat
