

# 3 STYLES. 2 CAPS. TRANSFORM YOUR FENCE

Aluminium slat installed vertically allows for a number of stylish design options including radiator/blade fencing or picket top fencing. A significant advantage of powder coated aluminium is the minimal ongoing maintenance required.

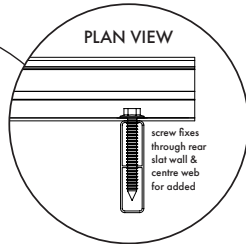

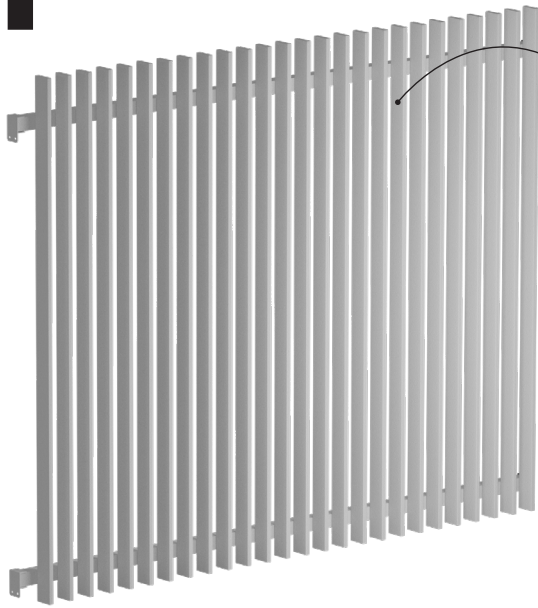

Our systems allow for easy NON-WELD assembly achieved via hidden screw fixings. The innovative horizontal top & bottom rails have an open back cavity allowing easy entry for screw fixing of slats. Screws are hidden by a simple snap in cover giving a seamless finish.

The simple screw fix system provides a significant cost saving versus traditional fully welded/fabricated panels.

# 1 RADIATOR/BLADE FENCING

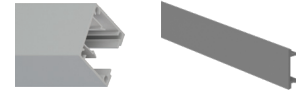

Pilot hole specification  
4mm or 11/64

## WHAT YOU NEED:

Select between 65x16.5mm or 90x16.5mm slat with centre web

45x45mm batten & rear snap infill

Aluminium horizontal brackets  
Pair of 2 - open side

12G x 65mm screws with a hex flange head

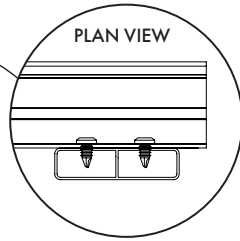

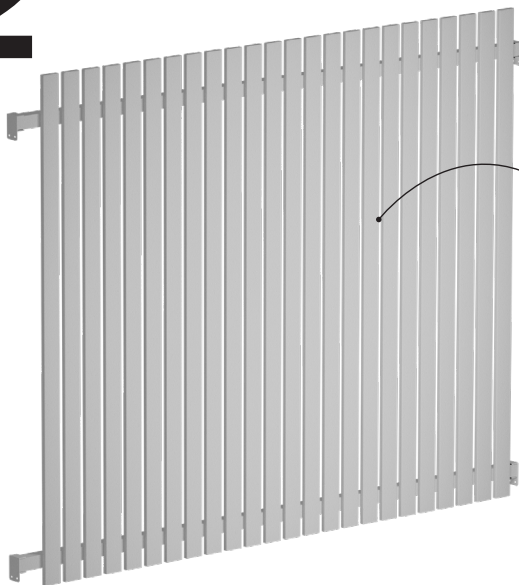

65mm or 90mm end caps.

Select the same size as your slat option

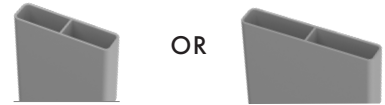

# 2 PALING FENCING

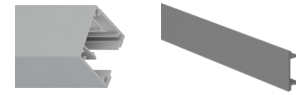

Pilot hole specification  
3mm or 1/8

## WHAT YOU NEED:

Select between 65x16.5mm or 90x16.5mm slat with centre web

45x45mm batten & rear snap infill

Aluminium horizontal brackets  
Pair of 2 - open side

Pan head screws

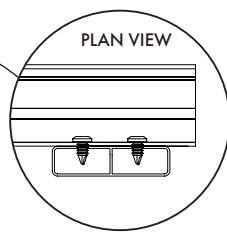

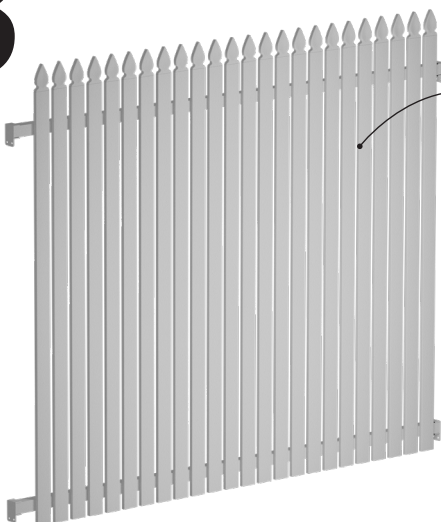

65mm or 90mm end caps.

Select the same size as your slat option

# 3 FEDERATION/PICKET FENCING

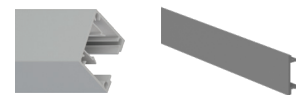

Pilot hole specification  
3mm or 1/8

## WHAT YOU NEED:

Select 65x16.5mm slat with centre web

45x45mm batten & rear snap infill

Aluminium horizontal brackets  
Pair of 2 - open side

Pan head screws

Federation topper
